A request for continued examination under 37 CFR 1.114, received May 31, 2005, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's Information Disclosure Statement, May 31, 2005 has been considered.

In the response of November 17, 2003, claims 4-6 and 13-27 were canceled. New claims 30-37 were added. Thus claims 1-3, 7-12 and 28-37 are pending and allowed.

The following is an examiner's statement of reasons for allowance:

The prior art fails to anticipate or properly render obvious a "method for operating a cardiac pacemaker, comprising: sensing atrial depolarizations...; sensing ventricular depolarizations...; pacing a ventricle in accordance with a particular primary pacing mode; and, switching the pacemaker to an atrial fibrillation pacing mode upon detection of an atrial tachyarrhythmia, wherein the atrial fibrillation mode includes ventricular resynchronization pacing delivered in a biventricular inhibited demand mode with a selected biventricular offset interval" as recited in independent claim 1 and thus those claims dependent thereon.

Additionally, the prior art fails to anticipate or properly render obvious a "cardiac pacemaker, comprising: an atrial sensing channel for sensing atrial depolarizations and generating atrial sense signals in accordance therewith; one or more ventricular sensing

channels...; right and left pacing channels for delivering paces to the right and left ventricles; a controller for controlling the delivery of paces in accordance with a primary pacing mode; and, wherein the controller is configured to switch the pacemaker to an atrial fibrillation pacing mode upon detection of an atrial tachyarrhythmia, wherein the atrial fibrillation pacing mode includes ventricular resynchronization pacing delivered in a biventricular inhibited demand mode with a selected biventricular offset interval" as recited in independent claims 28 and thus those claims dependent thereon.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
